

## Green Cat Renewables Job Advertisement – Project Manager

Location: Edinburgh (Stobo House, Midlothian Innovation Centre, Roslin) with travel expected to site as required.

### The Company

Green Cat Renewables (GCR) is a dynamic, innovative company that provides the complete range of technical services required to deliver renewable energy projects. The team of over 60 Engineers and Environmental Consultants deliver projects on behalf of Clients from three offices in Edinburgh, Livingston, and Biggar.

Through the Engineering Department the company provides Client's Engineer and Project Management services to clients developing renewable energy projects. This includes civil and electrical design; procurement; project finance technical assistance; contract preparation; negotiation; and management; site supervision; civil and electrical commissioning inspections; and complete project management.

Green Cat Renewables now require an Engineering Project Manager to join the Engineering team in Edinburgh to manage the delivery of a range of co-located renewable energy projects, including wind, solar, hydrogen, ammonia, and battery storage projects and to help continually develop the expanding client base.

### The Role

- Management and responsibility for a variety of renewable energy projects.
- Co-ordination of project team activities (internal & external) ensuring key milestones are met.
- Preparation and/or review of technical design elements.
- Preparation of documentation and management procurement processes.
- Ensuring financial and technical targets are met in delivering projects.
- Effective management of, and reporting on, project risks.
- Facilitation of agreements and contract negotiation.
- Management and supervision of contractors carrying out services and construction on projects.
- Communication with external stakeholders (e.g., landowners, developers, community bodies, planning authorities, community relations, grid network operators).
- Internal communication with project team and ensuring all corporate policies and quality management systems are fully adhered to.
- Business Development and sales responsibilities.

### The Candidate

The candidate will ideally have the following:

- Extensive demonstrable Project Management experience, leading projects and delivering project goals and objectives including:
  - o Risk Management
  - o Project and internal Budget Management
  - o Contract Management
- Experience in a consultancy organisation is desirable.
- Knowledge and experience of the UK Renewable Industry with an existing personal network.
- A degree in Chemical Engineering or Mechanical Engineering.
- Safety Risk Management experience ideally including the production of HAZOP, HAZID, and FMEA.
- Proactive, adaptable mind-set with a willingness to work independently or as part of a team.
- Excellent organisational skills.
- Excellent written and oral communication skills.
- Full UK driving licence, and willingness to travel within UK when required.

To apply please send a full CV and covering letter to [jobs@greencatrenewables.co.uk](mailto:jobs@greencatrenewables.co.uk) by the end of Friday 21<sup>st</sup> May 2021.
