

Engineering Project Manager

Location: Edinburgh (Stobo House, Midlothian Innovation Centre, Roslin)

The Company

Green Cat Renewables (GCR) is a dynamic, innovative company that provides the complete range of technical services required to deliver renewable energy projects. The team of over 60 Engineers and Environmental Consultants deliver projects on behalf of Clients from three offices in Edinburgh, Livingston and Biggar. GCR also works closely with its Canadian sister company – Green Cat Renewables Canada.

Through the Engineering Department the company provides Client's Engineer and Project Management services to clients developing renewable energy projects. This includes: civil and electrical design; procurement; project finance technical assistance; contract preparation, negotiation and management; site supervision; civil and electrical commissioning inspections; as well as complete project management.

Green Cat Renewables now require an Engineering Project Manager to join the Engineering team in Edinburgh to manage the delivery of a range of renewable energy projects and to help continually develop the expanding client base.

The Role

- Management and responsibility for a variety of renewable energy projects.
- Preparation and/or review of technical design elements.
- Preparation of documentation and management procurement processes.
- Ensuring financial and technical targets are met in delivering projects.
- Effective management of, and reporting on, project risks.
- Facilitation of agreements and contract negotiation.
- Management and supervision of contractors carrying out services and construction on projects.
- Communication with external stakeholders (e.g. landowners, developers, community bodies, planning authorities, community relations, grid network operators).
- Identify and provide project tasks/details for tracking purposes.
- Update the project team/disciplines on scope, status, changes of the project and schedule/expectations and ensure effective communication with all project stakeholders.
- Management, detailed tracking and communication of project progress from a task, time, schedule, and cost perspective.
- Manage changes in project scopes, identifies solutions for potential issues and derive contingency plans as required, while engaging the appropriate resources.
- Identify change orders, generate necessary documentation and negotiate such change orders with the client.
- Internal communication with project team and ensuring all corporate policies and quality management systems are fully adhered to.
- Carrying out Business Development to identify opportunities for additional business opportunities with current and potential clients.

The Candidate

- Chartered Engineer status preferable.
- Extensive demonstrable renewable energy Project Management experience as required for the role, leading projects and delivering project goals and objectives.
- Proven track record in planning, executing, managing and closing on projects.

- Proven track record of delivering projects within scope, on time and on budget.
- Ability to facilitate multi-disciplinary collaboration and team effort.
- Ability to manage, mentor, motivate and lead others.
- Ability to facilitate meetings and effectively capture decisions and actions.
- Experience in preparation of pre-FEED and FEED level reports and documentation to inform investment decisions.
- Problem analysis, deficiency identification and resolution skills.
- Procurement knowledge to provide guidance to procurement focal and to draft contracts.
- Knowledge and experience of the UK Renewable Industry with an existing personal network.
- Full UK driving licence.
- Willingness to travel within UK when required.

To apply please send a full CV and covering letter to jobs@greencatrenewables.co.uk by the 24th September 2021.
