

Green Cat Renewables Job Advertisement – Senior Civil/Structural Design Engineer

Location: Edinburgh

(Stobo House, Midlothian Innovation Centre, Roslin)

The Company:

Green Cat Renewables (GCR) is a dynamic, innovative company that provides the complete range of technical services required to deliver renewable energy projects. The team of over 110 engineers and environmental consultants deliver projects on behalf of clients from three offices in Edinburgh, Livingston and Biggar. GCR also works closely with its four sister companies Green Cat Hydrogen (GCH) and Green Cat Contracting (GCC) based in the UK, Green Cat Renewables Europe (GCRE) based in the Netherlands, and Green Cat Renewables Canada (GCRC).

Through the Engineering department, the company provides engineering consultancy and project management services to clients. This includes planning condition discharge; civil, structural and electrical design; hydrology and energy yield analysis; procurement; project finance technical assistance; contract preparation, negotiation and management; site supervision; civil, mechanical and electrical inspections; and other requirements relating to the design and construction of wind, hydrogen, solar, storage and hybrid projects.

Green Cat Renewables requires a Senior Civil/Structural Engineer to join the Engineering team in Edinburgh and drive forward project delivery for a range of renewable energy projects.

Roles & Responsibilities:

As part of the Engineering design team, you will be working on the civil and structural design of exciting renewables developments across all renewable technologies from project inception all the way to completion. Working within the team, your roles and responsibilities will include:

- Delivery of technically compliant, safe and commercially viable civil and structural design to enable the construction of wind, solar, hydrogen, BESS and grid infrastructure.
- Management of resourcing, budgets and programmes to ensure project scopes are delivered effectively.
- Liaise internally with the project team/manager and ensure all corporate policies and quality management systems are fully adhered to.
- Drive improvements to quality, competence and capabilities within the team with a preference towards mentoring.
- Undertake a H&S leadership role within the team, undertaking the Principal Designer and/or the Designer's role in accordance with the CDM regulations.
- Manage stakeholders, developers and contractor clients, and support business development.

The Ideal Candidate:

As a senior civil/structural design engineer, you can bring the following:

- Registration as a Chartered Engineer with a relevant professional body (ICE or iStructE).
- Deep technical design knowledge of site design, drainage, tracks, and industrial/utility structures.
- Understanding of geotechnical investigation and design.
- Strong soft skills with the ability to mentor team members and manage internal and external stakeholders effectively.
- Experience working with, and managing, a diverse range of technical stakeholders.
- Willingness to travel within and outwith the UK if required.
- Valid Driving Licence for use within the UK.
- Right to work in the UK on a full-time basis.

Benefits:

- Competitive salary.
- Private medical healthcare.
- Company pension scheme.
- 25 days' annual leave and 8 flexible bank holidays.
- Cycle to work scheme.
- Professional development opportunities and support.
- Company social events and team building days.
- On-site parking with EV charging points available to staff.
- Flexible working opportunities.
